Sarina Roffé presents the how and why cueing was developed and why it is effective at increasing literacy among children who are deaf/hard of hearing. She will discuss how hearing children learn language and then reading as compared to the path for deaf children. In particular, communication in the home will be stressed as the foundation for literacy.

In a 5-minute segment– “A Taste of Cued Speech,” participants will learn how words are put together with cues and how to read the Cued Speech chart. The presentation will include personal anecdotes, myths and opportunities for interactive discussions.

CLTs will be provided. Contact Suhad Keblawi (skeblawi@cuedspeech.org) if any other accommodations are needed.
